

Objective

The reason why I chose this career path is because of the challenge. I love the fact that I will never know "everything" about web and software development. That concept intrigues me and makes me desire to prove it wrong. My reasoning for stating this is that I am looking to find a job that allows me to not only showcase my talents, but to allow me to learn and grow with the industry as well.

Quick Facts

- 3+ years development experience
- Bachelor's I.T. – Software
- Multiple I.T. Certifications
- Eager to learn
- 6+ years volunteer firefighter
- Enjoy team projects
- Adaptable programmer

Why Me

I am at an optimum stage in my career to best benefit you! I'm comparable to a template, so to speak. I am not a blank page, and I am not a finished product. I know enough about concepts, procedures, and techniques to accomplish many tasks, and I can easily adapt to your company's approach to business

Experience

Howard Technology Solutions (2012 – present)

I am employed as a Web Developer at Howard Technology. Howard is a multi-million dollar resell company specializing in Information Technology sales. While here, I have utilized many different methodologies and strategies to complete projects and tasks at hand. The majority of my work uses ColdFusion, CSS3, HTML, JavaScript, jQuery, and Microsoft SQL Server. Below are some completed tasks:

Tasks

- Developed a report builder system allowing managers to create custom reports for statistical and analytical purposes
- Constructed the Ecommerce Dashboard consisting of reporting programs, analytical tools, live charts, and price adjustment calculators
- Provided the company with a project management program allowing managers to keep track of delegated tasks, ongoing projects, approaching deadlines, and project reviews
- Meet weekly with the company CEO, Executive Vice President, and Vice President of I.T. to discuss ideas, strategies, and plans of action for the Ecommerce division
- Maintain code for the company wide CRM and Quote/Order system

Certifications

- CIW JavaScript Specialist (ID0-635)
- CIW Web Design Specialist (ID0-520)
- CIW Perl Specialist (ID0-437)
- CIW Database Design Specialist (ID0-541)
- CompTIA Network+
- CompTIA Security+

Databases

- Microsoft SQL Server
- MySQL
- Access

Mobile

- IOS Application Development

Technologies

- ColdFusion
- HTML5
- CSS3
- JavaScript
- JQuery
- BootStrap
- .NET
- Java
- PHP
- XML
- Photoshop
- PhoneGap

Operating Systems

- Windows
- Macintosh

Personal Projects

Ninja Dodge Ball is an app that I began working on in my free time. I was very interested in learning a new programming language in Objective C. The app is a fully functioning app that only lacks Apple's approval before it is released live on the App Store. The only reason it is currently not live is due to the fact that I want to integrate ads into the gameplay and have not had the time lately to complete that aspect. I look forward to completing it in the near future.

Western Governors University (2013-2014)

- Bachelor's Degree - Information Technology: Software Emphasis
- 3.0 GPA

Jones County Junior College (2009-2012)

- Associate's Degree - IST: Computer Programming
- Associate's Degree - Applied Sciences
- 3.5 GPA
